MENOY Actions
MENOY Help
• The program is based on and requires Microsoft Office Access.
• Its purpose is to monitor the family's Expenses in order to achieve the best possible management of them.
At the same time, it offers the ability to separately display the Family Expenses that are deductible in the Tax Declaration and reduce the annual gross income.
• However, it also provides the possibility to track the movement of the Cash Balance, if desired, as long as you also record your Income.
• In this version, "Cash Balance" means the total of Cash plus Deposits combined.
• In the future, if requested, there will also be a version with separate monitoring of the above.
• The program's operation is described below by briefly explaining the various menus.
In summary, we mention here:
• Your documents (receipts, etc.) are entered from the ENTRIES/TRANSACTIONS menu.
